Research interests

Representation learning, Deep reinforcement learning, Neuroevolution, Quality-Diversity, Robotics

Education

2016 – now **PhD researcher**
Robot Intelligence Lab, Imperial College London
Thesis title: Parameter Space Abstractions for diversity-based Policy Search
Researched approaches for efficient diversity-based policy search, in the context of movement control policies for continuous robot control. Developed methods based on active learning, gaussian processes, generative models and evolutionary algorithms.

2011 – 2013 **MSc European Master On Advanced Robotics (EMARO), double degree**
Thesis development: Keio University, Japan
2nd year: Ecole Centrale de Nantes, grade average A
1st year: University of Genova, grade average A

2007 – 2011 **BSc Mechatronics, Robotics and Automatization.**
Faculty of Technical Sciences, University of Novi Sad.
240 ECTS, grade average 10 [100/100]

Employment and academic activities

09/2018 – 01/2019 **Research Intern: DeepMind,** London, UK
Researching methods for state-space exploration for efficient Sim2Real transfer, in the context of reinforcement learning for continuous robot control.
[Host: Francesco Nori]

(06 – 08)/2017 **Data Scientist: WeAreHuman.io (previously CitySail),** London, UK
Developing and implementing models for real-time human personality estimation.

01/2015 – 05/2016 **Research Assistant: iBug group, Imperial College London,** UK
Researching non-linear sequential probabilistic models for emotion intensity recognition, based on facial expressions and audio data. Developed multimodal neural conditional random fields for behaviour analysis, specifically interpersonal agreement.

2015 – now **Graduate Teaching Assistant: Imperial College London,** UK
Machine Learning (prof Maja Pantic),
Computing II, Robotics (Dr Petar Kormushev)
Data Structures and Algorithms (Dr Heikki Peura)

12/2013 – 07/2014 **Research Engineer: RIS group, LAAS-CNRS,** Toulouse, France
Researching methods for rover locomotion diagnostics using proprioceptive sensor signals obtained in field experiments. Focusing on sequential machine learning methods for modelling temporal dynamics of rover locomotion.

07/2013 MSc thesis testing sessions: Japanese Aerospace Exploration Agency's (JAXA) Institute of Space and Astronautical Science on the "Cuatro" rover test bed

2011 Team leader: National robotics competition (EUROBOT)

(09 – 10)/2010 **Intern: Mihajlo Pupin Institute,** Belgrade, Serbia
Developing movement controller code for a 5 DOF robotic arm and a small rover.
[Host: Professor Aleksandar Rodić]

Skills

Computer skills	[active] Python, Tensorflow, MuJoCo, Box2D, PyBullet, LaTeX, Git [passive] PyTorch, MATLAB, C/C++, Solid Edge, Pro/ENGINEER
Languages	Serbian, English, Italian, Spanish, French
Hobbies	Capoeira Club "Capoeira Associação Sérvia" (since 2005), Surfing, Drawing

Seminars

2020	DAAD Postdoc-Net-AI Fellow
2019	Machine Learning Summer School, London, UK
2017	Deep Reinforcement Learning Bootcamp, Berkeley, CA

Awards and recognitions

2016 – 2020	Imperial College London President's PhD Scholarship
2011 – 2013	Erasmus Mundus scholarship laureate for the EMARO MSc programme
2010/2011	Declared best student in generation 2010/11, University of Novi Sad
2010 – 2013	"Dositeja" scholarship laureate, Ministry of Youth and Sport, Republic of Serbia
2009/2010	University of Novi Sad scholarship laureate
2008 – 2012	Annual award to exceptional students, Ministry of Education, Republic of Serbia
